The latest version, AutoCAD R2012, introduced new features for data interchange. It supports AutoLISP for AutoCAD 2000 or later. Unlike the previous version, this is limited to point and line data, and the drawing information is not displayed. A feature called "AutoCAD in Cloud" is available to connect to other applications via the Internet. , Microsoft, and Xceed Software are developing the Open Design Alliance that hopes to do away with the need for .dwg files entirely. Instead, a program would allow drawing in virtual reality or on mobile devices. In particular, they have been developing a new custom interface for drafting in virtual reality.
