First of all, the game is basically GREAT. All in all a great open world game with a good story and that's just the games only problem. The developers are doing a great job on the game, and it has a rich content. The problem is the lack of originality. The game is originally a huge city where you go around and find out where to go and what to do. The original game was cool, but it seems the developers have got bored of this world and went and did a sequel. I don't see how this is a sequel, it really is a whole different world, one that's completely different from the original one. For example, they have completely different types of NPCs to meet and talk to and even different collectibles for you to find. I would love it if they'd done this because that would have been a true seguel rather than a different world with some original things in it. The reason I say this is because I think they could have made the world a little more similar to the original and still expanded it enough. This is

done really nicely and still keeps the original game's sense of fun and noir. The city is still really big and just like the original, you can go where you want to. It doesn't take away from the original game's feeling of freedom because you aren't forced into certain routes and this time you aren't even being pushed to find items or collectibles. I think this is a true sequel in the most meaning of the word and we get a whole new experience in the game. The story is done really well and it has some interesting puzzles and things for you to get involved with. This time we know where the story is going and it is done well with good twists. The game's voice acting is done really well and it's just quite good all in all. The graphics are decent and could be a little better but they have made the whole city a lot more open. I guess they have tried to make it more open to show the place and the world but

it has made it quite confusing as you can actually go everywhere and everything. You can go into shops and find stuff which would have been a bit annoying if the city was already open and you had access to everything. The characters are really great and make you want

to go look around and see the world. They add so much to the world and show you what the people are all about. You can go to the dentist c6a93da74d
