g. unfavorable to the method of quantification: sociology is not favorable to the quantitative methods. sociology is not focused on the number of the phenomena. it is focused on the quality of the phenomena. the numbers are not going to affect the quality of the social phenomena. h. unfavorable to the method of qualitative research: sociology is not favorable to the qualitative research. there is not going to be any qualitative data collection method. the only qualitative methods available are the semi-qualitative methods. the data is going to be analyzed qualitatively to show the meaning and impact of the social phenomena. it is understood that society is a great complex of organised units, each of which is the product of, and contributes to, the larger whole. it is a social whole, a society, composed of individuals, and individuals are social products, the product of society.<sup>1</sup> the complex of social relations which make up a society, are interwoven, interacting and changing. to study these relations is the field of sociology. sociology is a science of social order, or of the arrangements of human social relations. it is the science of society, or of the relationships of individuals to their groups, their families, and their other social relations.<sup>2</sup> sociology is the science of society. it attempts to discover the fundamental factors which make up social order and the ways in which such order is shaped, or produced. there is no unique definition of the term sociology. it is a term which embraces the broad field of social science and thus includes every branch of human knowledge, including history, the natural sciences, economics, law, literature, religion, philosophy, political science, mathematics, and psychology. sociology, however, is not a single science, but a large branch of knowledge. it is distinguished from the other sciences by two characteristics. its subject matter is the human society. it is a science of social order, or of the arrangements of human social relations. the other distinctive feature of sociology is its method.<sup>3</sup> sociology is the science of society, or of the relationships of individuals to their groups, their families, and their other social relations.

### **Horton And Hunt Sociology Pdf**

cooley believes that sociology is concerned with

---

investigating the complexity of human society. his view is that we should study society as a complex adaptive system. he believes that the study of human society is, in fact, a science. cooley stresses that sociology is a science that is not a philosophy or a theology. its purpose is to discover the laws and forces that govern human life. social institutions are the ways and means by which people organise themselves into groups and societies. social institutions serve to preserve what is best in the past of the human race. among the best known social institutions are religious institutions, political institutions, economic institutions, cultural institutions, and ideological institutions. an example of social institution is a system of norms to achieve some goal or activity that people feel is important, or more formally an organized cluster of folkways and mores centered around a major human activity. horton and hunt define it as social institution is a system of norms to achieve some goal or activity that people feel is important, or more formally an organized cluster of folkways and mores centered around a major human activity. durkheim has gone to the extent of defining sociology as the science of social institutions. giddings regards institutions as the organs that conserve what is best in the past of the human race. the term 'system of norms' to achieve some goal or activity that people feel is important, or more formally an organized cluster of folkways and mores centered around a major human activity. horton and hunt define it as social institution is a system of norms to achieve some goal or activity that people feel is important, or more formally an organized cluster of folkways and mores centered around a major human activity. durkheim has gone to the extent of defining sociology as the science of social institutions. giddings regards institutions as the organs that conserve what is best in the past of the human race.
