
Updater Firmware Vodafone K3806z

[Download](#)

* the above table lists the mobile phones that are compatible with the vodafone wi-fi hub (m500, m55, m58 and m-series dect handsets). the vodafone wi-fi hub firmware is compatible with these mobile phones. ** the above table lists the mobile phones that can be provisioned over the vodafone wi-fi hub (m500, m55, m58 and m-series dect handsets). the vodafone wi-fi hub firmware is compatible with these mobile phones. *** the above table lists the mobile phones that are compatible with the vodafone wi-fi hub firmware but are not able to be provisioned over the vodafone wi-fi hub (m500, m55, m58 and m-series dect handsets). if the vodafone wi-fi hub is connected to 4g backup, you may want to perform a factory reset. please be aware, performing a factory reset will restore any customization to the default option (including any wi-fi name or password changes), disconnect any saved devices and automatically install any new firmware updates (this may take up to 10 minutes). to perform a factory

reset, follow these steps: the firmware package for the vodafone k3806z is currently version 1.19.4. this version may be listed as version 1.4, 1.5, 1.6, etc on the release notes. the change from version 1.4 to version 1.5 is a minor update that is only related to firmware version numbers. version 1.5 is identical to version 1.4 and is recommended for most users. new features introduced in version 1.6 are not included in version 1.5 and are only included in the firmware package for version 1.6. if you have problems, check the system log. this is located at `/sdcard/android/system/log/debug.txt`. look for any errors that may have occurred during the upgrade process. if you continue to have problems, you may be able to rollback to the previous firmware version by following the instructions below.
